Very helpful for the majority of the tuneup my fiance and I completed ourselves. A couple of items ahem, ahem, coolant flushing could have been a bit more detailed with better pictures compared to a random picture of the engine from underneath the vehicle that you really dont know where to begin looking. But overall, very helpful for changing oil, thermostat, rear differential, transmission filter, and spark plugs. Cheaper than a mechanic!Its a whole lot better then having to take it to a repair shop and getting charged for it. It will give all the information youll need to know about your vehicle. A big plus for me though with this book was the price for it. So i definetly got lucky on this one.One example is the parking brake theres a sentence about replacing the shoes, but no information about testing or adjusting them, or if theyre selfadjusting. A Haynes book may have been a better choice, but it has been my experience that its often good to have both Chilton and Haynes books as one may miss something that the other has good coverage of, and viceversa.Unless you get a shop manual, no

Well assume you're ok with this, but you can optout if you wish. You don't realize it until you start driving Jeeps have long been the cool brand of cars, and that's not showing any signs of slowing down. These will apply whether you're driving a Jeep Cherokee or a Wrangler. That history continues on through the community of Jeep owners. During that time, the War Department realized it needed a vehicle that was fast, nimble, could handle the terrain and replaced horses and motorcycles. It did so in 75 days and named the Blitz Buggy. The War Department took the original designs and handed them over to Ford and Wily's Overland Motors to encourage them to produce the vehicles. The War Department originally awarded contracts to all three companies. After each company created their own versions, the Department settled on Wily's Overland because it had the most powerful engine. The vehicles served many purposes, from transporting wounded soldiers to carrying supplies. They were used in every theater of World War II. AMC, Chrysler, DaimlerAG, and Fiat. These ownership changes were due to buyouts, and each company recognized the value of the Jeep brand. It's had a large loyal following for decades. It was a general purpose vehicle. In the Army, general purpose was abbreviated to "G.P." There was a character named Eugene the Jeep. He wouldn't do much except say "Jeep." Take a look at these top 6 tips. As long as you wave, you're good. It's subtle. It's a cool wave. You can give a nod to the other Jeep owner to acknowledge they have good taste in cars.

They're dependable and reliable, but they also require a level of expertise specific to Jeeps. You'll need the expertise especially for older models with manual transmission. Some of it, you can do yourself. Other repairs will require a skilled mechanic. You can add a tire well in the back or strengthen your springs for serious offroading. That's why it's important to plan ahead. There are clubs and gatherings to get into. Remember, you're not a car owner. That's for everybody else. You're part of a community. Getting all of those parts to work together isn't easy. Think about it, why else would you need a car that you can take through mud and other terrains It's fun! That's why you want to make it a point to go to Jeep related events. Whether you love to read about them, reminisce about great car models or restore them, this is a place for you. In our opinion, you can never go wrong with a truck. Whether you're single or have a large family, trucks can support all lifestyles. After all, cars have great fuel efficiency, nice features, and decent safety ratings, don't they However, we still think you're better off with a pickup. Keep reading to learn why. This can be especially useful during seasons of inclement weather. Trucks perform well in snow, rain, slush, ice, mud, and more. Cars, on the other hand, can often be found getting pulled out of sticky situations by truck owners. We get it, nothing is certain in our economy and you don't want to spend a fortune on gas. Fortunately, most newer trucks come equipped with technology that limits engine output when it isn't needed to help you save on fuel. Keep in mind, fuel efficiency in any vehicle can be improved based on how you drive. This could be trailers for work or campers and boats for recreational activities. Whether you're working on home improvement projects and need a vehicle capable of

hauling building materials or are helping your friend move, a truck is a necessary asset.

They can also be quite handy when it comes to transporting larger loads, such as gravel, dirt, equipment, and more. They're big and sturdy, and in the event of hitting wildlife or colliding with another vehicle, you're going to be well protected. In fact, the Ram 1500 was the only truck to receive the Insurance Institute for Highway Safety Top Safety Pick Plus award in 2019. If so, as mentioned above, we really think you should consider buying a truck. However, before you make your choice, be sure to check out some of our other articles for more information about cars, trucks, vehicle maintenance, and more. Here are some jeep maintenance tips to help you avoid costly repairs and keep your jeep running smoothly! In March 2018 alone, there were over 19.6 thousand new proud owners of this SUV. The 2018 Wrangler even took home the prestigious Residual Value Award ! That doesn't mean you don't need Jeep maintenance anymore though. Remember, it's still a machine, and for a machine's gears to keep turning, it needs some greasing. So, here's a guide on the easiest DIY Jeep upkeep tasks you can give a go. Or when winged creatures decide to drop a bomb in front of you. That's a lot of work for your wipers. That's why you need to have them checked or better yet, have them replaced every six months. You don't even need any special tools. You only need to check your Jeep service repair manual to find out the exact type of wipers you need. Also, factor in fall and winter seasons when scheduling your wiper replacement. So, before doing anything with this underthehood component, make sure it's completely disconnected. That starts with taking off the negative node. See any white residue. If so, then it's time you clean it. It also reduces the risk of your battery life draining sooner than later.

The entire process won't take you more than 30 minutes, so why not do it now If you notice swelling, weird smells coming out of it, or bubbling liquid seeping out, those are signs you already need a battery replacement. It takes patience, but all in all, it's a pretty straightforward job. Refer to your Jeep's manual in case you're unsure. Also check the manual for the correct plug gap size, since the part supplier will need this when you buy the replacements. That's based on the number of cylinders your engine has. Clean the cylinder you took out the plug from, and then replace it with the new one. Remember, there's a cylinder sequence order you need to follow, and failure to do that can turn your DIY project into a nightmare. If you have an eightcylinder engine though, expect to work on it a bit longer. That's why you need a good ratchet and wrench set, so you'll have an easier time loosening those plugs. But a dirty or worn filter won't benefit your Jeep either. It can affect gas mileage, fuel efficiency, and overall engine performance. Say you have a Cherokee. The first thing to do is to check your Jeep Cherokee's manual to locate the specific area where the filter is. Remove the old filter. Before putting the new one in, make sure you clean the box first. Depending on your Jeep's make, you may hear a click as the new filter slides and secures into place. Put the lid back on, and voila, you're done! But since we're talking about Jeeps here, you don't have to change it until after 30,000 miles. Of course, if you often drive on littered or dirt roads, you'd have to take that into consideration too. But considering that you only need a replacement every three years, that's one expense you shouldn't mind shelling out money for. Plus, the job itself will only take you 1015 minutes tops. Plus, changing the oil in these beasts is simple. Once you know where that it is, get under your car and look for the drain plug. A catch basin will do the trick. Let it all out!

Remove the worn filter and swap in the new one. Splash some fresh oil on the filter's gasket before screwing it tight. Easy, right So long as you have your owner's manual, the basic tools, and you follow these instructions, you can save on your Jeep ownership costs. So, make sure you check out

Now that the days of twine and placard Now that the days of twine and placard advertisements have come and gone, these decorative vanity items provide bursts of color for cars and the drivers who own them. If so, car bumper stickers are a fantastic opportunity to add personality to your vehicle. Modern adhesives may initially appear worrying when you get your hands on them. They've been purposely designed to slip off effortlessly and without defacing or devaluing your car. The bumper sticker covering the paint has shielded it from the elements. While that section of paint is brand new, the rest of your vehicle, unprotected, may have lost some of its luster throughout the years. The patch should barely be detectable to a discerning eye. Scrub down the section of your bumper intended for the sticker and ensure all the dirt has been removed. A paint roller may help with this process. While completely safe for your paint job, it's also just as easy as applying the sticker in the first place! We suggest either a credit card or gift card. Don't use a sharp object, such as a blade, as you may accidentally scrape yourself or the paint on your vehicle. You want it to slip underneath the sticker and penetrate the powerful glue underneath. However, avoid substances that contain acetone, such as nail polish. It will eat through your car's paint job. But they are certainly a completely safe accessory that's sure to personalize your car. Are you looking for a list of good first cars for your child. Look no further because we've got the list of unique but quality cars that you need.

It may not seem like much compared to the 15,098 average annual miles of 2034 yearolds. Yet, you want to get your kid a car that can run those miles and still be affordable. Some parents get their teenagers old, beaten cars from a used car shop. For a family on a budget, that's no problem at all. Investing your money in a timeworn but still operational ride will be worth it. It has good bones, a removable hardtop, and straight lines. Furthermore, Velocity Restorations can always add more modern amenities on this sweet ride. It's a good starter car for any teenager. The best part is they get to choose how the restoration goes. Well, picking up this Scout 800 restoration project should be an interesting and worthwhile task for your kid. Let him work on his creative side. It will be his pride and joy to showcase a wellrestored Scout 800. After all, it's not every day you spot a 1971 International Scout 800 on the road. It allows them the space to bring friends on a road trip or an awesome vacation. Better yet, let them choose whether they like an SUV or a pickup truck body style. International Harvester was one of the best companies at creating simple SUVs. One thing is for sure it made a great best first car for many seniors. The International Harvester brand has a loyal following, and your kid will enjoy being a part of it. If he doesn't, he can always save up to buy a car of his own choosing. Get a custom interior for a cozier space. A lower suspension height gives the extra safety measure and better handling. There is an estimate of 250 U13 Roadsters left existing out of the 5000. With a car this unique and stylized, who's to deny such a gift Your kid can even choose to replace the engine with a Coyote engine for supreme performance. You'll also earn more "cool parent" points for it. It would make an awesome congratulatory gift for getting notable awards. The Scout 80 series was first of the offroad cars designed for civilians.

And though it isn't clear, it may be the critical link between the military Jeep and the modern SUV. Should your teenager want a powerful engine, let him have it. Custom touches and a new drivetrain will also give this car a personal twist. This is good news for parents who want their kids to learn to appreciate what they're given. It's also great for parents who only have a limited budget for their kids. It's a classic car from the Scout series, after all. It's not only reliable but also perfect for starters. If you're on a tight budget, get your kid to contribute for the restoration. Teach your children that all good things need selfdiscipline and patience. It's the best first car for teenagers who are also car enthusiasts. Restyled right, this reliable vehicle can last for a long time in possession of your child. It won't only be a perfect first for your kid's eventual car collection. It will also be one with sentimental value as it's a gift coming from you. They're not only good for fresh graduates, but they're also highend cars for beginners. Not bad for a first car at all. We offer quality, reliability, and great performance for all restoration projects by giving you the information you need
